

Opportunity Partners is redefining the service model for people with disabilities. Over the next five years, we will become the region's premier vocational training and placement center that will meet the needs of a changing workforce, filling gaps in employment and helping those we serve earn wages that enable them to be in and of the community.

Opportunity Partners participants are already an active part of the workforce. Without support of organizations like ours, these individuals would not be contributing to the community, or earning wages to help support themselves.
